INSPECTABILITY, TECHNOLOGY, AND FREEDOM OF DESIGN.

EN CBI Europe is a leading manufacturer of raised access floors, with an output of over a million square metres a year. CBI Europe's integrated floor systems are 100% made in Italy. Twenty five years of development and the experience gained from installations in 70 different countries around the world ensure that CBI Europe's raised floor systems solve all the problems normally caused by incompatibility between architectural restrictions and the perpetual changes demanded by evolving technology. CBI Europe's floors also create environments with a high level of sustainability and livability.

Where _ new-build and refurbished offices, banks, operations centres, control rooms, hospitals, homes and public buildings.

How _ using easy access, inspectable panel structures to create high-tech raised floors in a wide range of types and finishes.

Why _ CBI Europe's integrated floor systems are versatile, high-tech, sustainable, easy to install and inspect, and the perfect solution for all types of structural and design requirements.

| inspectabilité, technologie, liberté conceptuelle.

FR 100% made in Italy: ce sont des systèmes intégrés pour planchers techniques surélevés de CBI Europe, une entreprise leader avec une production de plus de 1 000 000 de m² par an. Élaborés en 25 ans d'expérience et de comparaison avec les concepteurs et réalisés dans 70 pays du monde, les planchers techniques des systèmes CBI Europe résolvent avec succès toutes les problématiques liées à l'incompatibilité entre les musts structurels et les métamorphoses continues imposées par l'évolution technologique. Avec un égard particulier à l'écologiquement durable et à la qualité de vie des espaces réalisés.

Où _ réalisations ou restructurations de bureaux, banques, centrales et salles de contrôle, hôpitaux, habitations résidentielles et locaux publics.

Comment _ avec des structures surélevées technologiquement de pointe et des panneaux accessibles et inspectables dans différentes typologies et finitions.

Pourquoi _ polyfonctionnel, technologique, écologiquement durable, facile à installer et accessible à tout moment, le système intégré Floors est la bonne réponse à n'importe quelle exigence de réalisation et de conception.

| ispezionabilità, tecnologia, libertà progettuale.

IT 100% made in italy: sono i sistemi integrati per pavimenti tecnici sopraelevati di CBI Europe, azienda leader con una produzione di oltre 1.000.000 di m² ogni anno. Elaborati in 25 anni d'esperienza e confronto con progettisti e realizzazioni in 70 paesi nel mondo, i pavimenti tecnici dei sistemi CBI Europe risolvono con successo tutte le problematiche legate all'incompatibilità tra must strutturali e le continue metamorfosi imposte dall'evoluzione tecnologica. Con particolare attenzione all'ecosostenibilità ed alla vivibilità degli ambienti realizzati.

Dove _ realizzazioni o ristrutturazioni di uffici, banche, centrali di controllo, sale quadri, ospedali, abitazioni residenziali e locali pubblici.

Come _ con strutture sopraelevate tecnologicamente avanzate e pannelli accessibili ed ispezionabili in varie tipologie e finiture.

Perché _ versatile, tecnologico, ecosostenibile, facile da installare ed accessibile in qualsiasi momento, il sistema integrato Floors è la giusta risposta per ogni tipo di esigenza realizzativa e progettuale.

PERFECT STYLING

EN CBI Europe's **Raised Access Floors** use wood agglomerate or calcium sulphate panels obtained from recyclable raw materials and manufactured in certified and constantly monitored processes to guarantee the highest standards of quality and safety. CBI Europe floor panels are available fully finished and ready to install or bare, for covering after installation. They can be used in all types of floor, and effectively reduce building delivery times while improving the inspectability of underfloor systems and the integration of advanced climate control systems.

le projet parfait.

FR Les systèmes **Raised Access Floors** by CBI Europe sont réalisés avec des panneaux en aggloméré de bois ou en sulfate de calcium obtenus de matières premières recyclables et avec des procédures certifiées et de suivi, garantissant des standards de qualité et de sécurité toujours élevés.

Les panneaux - avec finition et prêts à installer ou à revêtir après la pose - peuvent être utilisés dans n'importe quel type de réalisation, en permettant d'accélérer les délais de livraison des édifices, l'inspectabilité des installations et l'intégration avec des systèmes de climatisation de pointe.

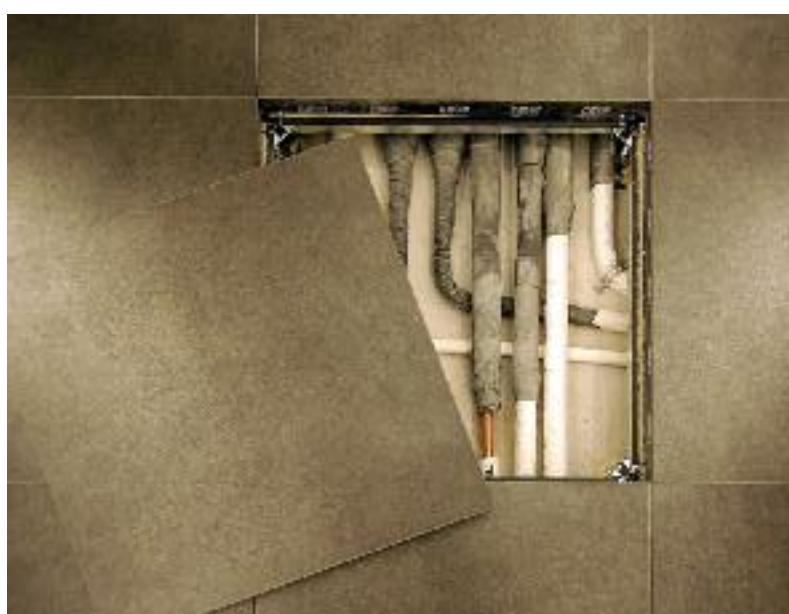

il progetto perfetto.

IT I sistemi **Raised Access Floors** by CBI Europe sono realizzati con pannelli in conglomerato ligneo o in solfato di calcio ottenuti da materie prime riciclabili e con procedure certificate e monitorate, a garanzia di standard qualitativi e di sicurezza sempre elevati.

I pannelli - con finitura e pronti da installare o da rivestire dopo la posa - possono essere utilizzati in ogni tipo di realizzazione, consentendo di velocizzare i tempi di consegna degli edifici, l'ispezionabilità degli impianti, l'integrazione con sistemi avanzati di climatizzazione.

100% ITALIAN TECHNOLOGY AND PRODUCTION
TECHNOLOGIES ET PRODUCTION 100% MADE IN ITALY
TECNOLOGIE E PRODUZIONE 100% MADE IN ITALY

CBI Europe's raised access floor systems let you create floors with 100% or **access-panel inspectability**, giving easy access to water pipes and electrical cables and permitting easy reconfiguration of rooms.

Les systèmes Raised Access Floors by CBI Europe permettent de réaliser des planchers surélevés avec un **espace inspectable à 100%** ou par le biais d'une trappe de visite : simplicité d'accès aux installations hydrauliques, électriques et de câblage, ainsi que de reconfiguration d'usage des espaces.

Con i sistemi Raised Access Floors by CBI Europe si realizzano pavimenti sopraelevati con **intercapedine ispezionabile** al 100% o tramite botola: semplice l'accesso agli impianti idraulici, elettrici e di cablaggio e la riconfigurazione d'uso degli ambienti.

CALCIUM SULPHATE PANELS

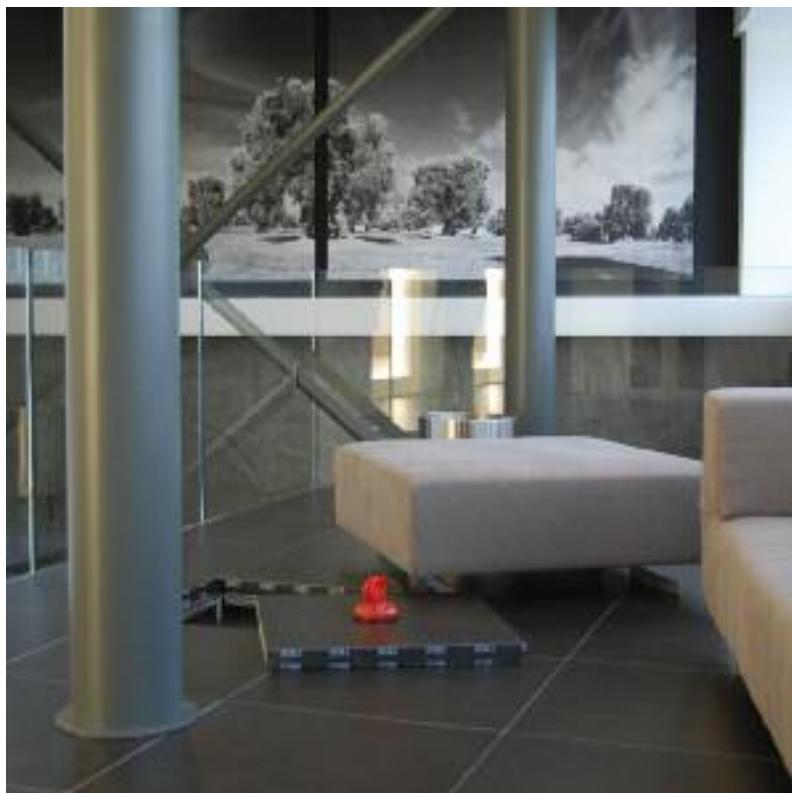

EN Produced from **100% recyclable materials** (water, recycled paper and gypsum), CBI Europe's calcium sulphate panels make a major contribution to LEED ratings. Their above average density to weight ratio also allows them to resist high traffic. These panels are particularly easy to handle and can be cut to shape on site. Their structural characteristics ensure excellent resistance to fire and humidity as well as an extended working life.

panneaux en sulfate de calcium.

FR Produits avec **100% de matière première recyclable** (eau, papier de récupération et plâtre), les panneaux permettent de contribuer à l'obtention de crédits Leed. Leur rapport densité/poids supérieur à la moyenne détermine la forte réduction de l'impact au piétinement. Hauts niveaux de maniabilité sur le chantier lors de la coupe et du déplacement. Leurs caractéristiques structurelles les rendent hautement résistants au feu et à l'humidité, tout en leur conférant une excellente durabilité.

pannelli in solfato di calcio.

IT Prodotti con il **100% di materia prima riciclabile** (acqua, carta di recupero e gesso), i pannelli consentono di concorrere all'ottenimento di punteggio Leed. Il rapporto densità/peso superiore alla media determina la forte riduzione dell'impatto al calpestio. Alti anche i livelli di lavorabilità in cantiere, nelle fasi di taglio e di movimentazione. Le caratteristiche strutturali ne decretano la massima resistenza al fuoco, all'umidità e l'ottima durabilità.

limitless practicality.

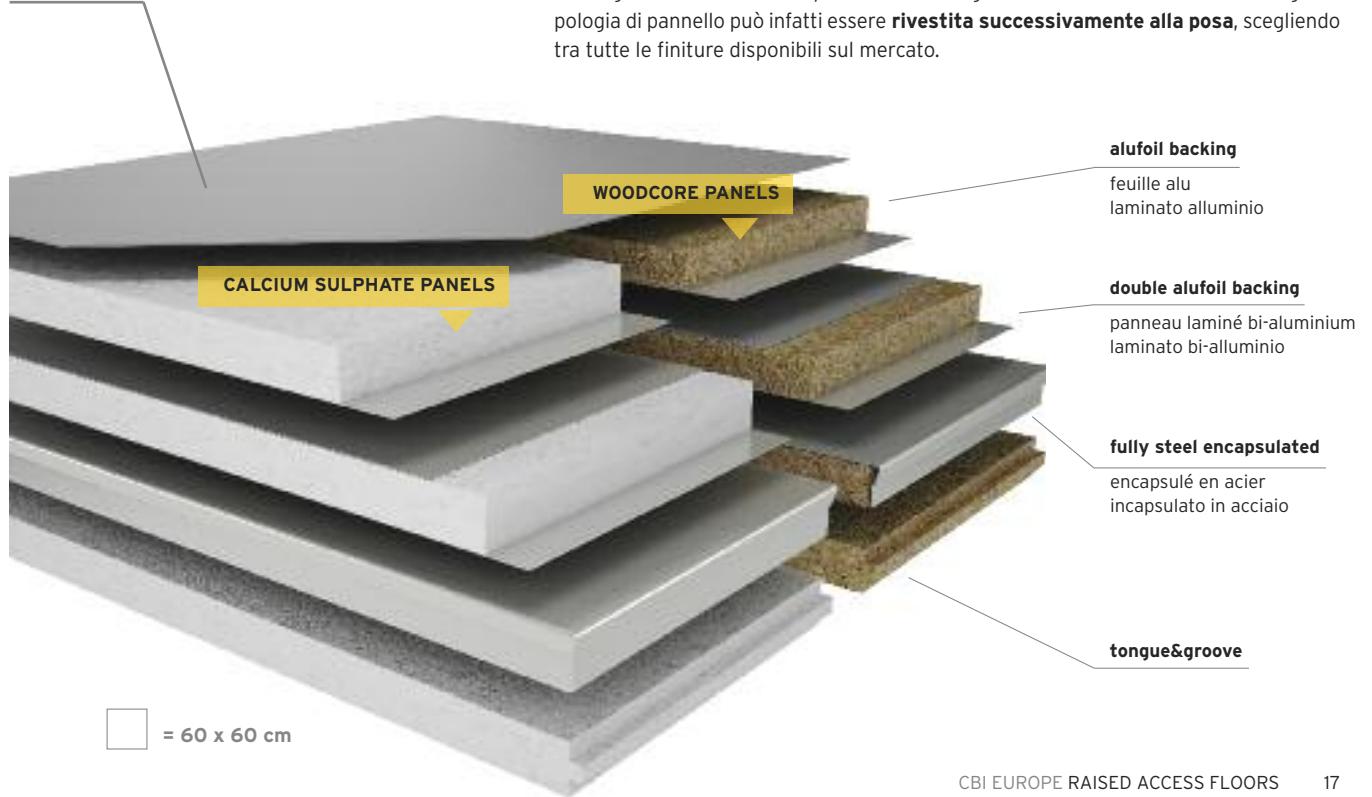

EN CBI Europe's Bare Panels in wood agglomerate and calcium sulphate are available in fully steel encapsulated, alufoil backing, double alufoil and tongue&groove versions (calcium sulphate panels only). They permit direct or access-panel inspection of the under-floor plenum, and are ideal for use in buildings that have to be fully homologated prior to delivery to the customer and prior to finalisation of the room layout. All CBI Europe's bare panel floors can be **covered after installation** using any type of commercially available floor covering.

pratique sans limites.

FR Les **Bare Panels CBI Europe**, en aggloméré de bois ou en sulfate de calcium, sont disponibles complètement encapsulés en acier, avec feuille d'aluminium double ou simple et - seulement pour ceux en sulfate - avec système tongue&groove. Ils permettent d'accéder au plenum directement ou à travers une trappe de visite, et ils représentent la solution idéale pour les édifices à livrer au client déjà homologués, avant de définir leur destination finale: en effet, chaque typologie de panneau peut être **revêtue après la pose**, en choisissant une des finitions disponibles sur le marché.

praticità senza limiti.

IT I **Bare Panels CBI Europe**, in conglomerato ligneo o solfato di calcio, sono disponibili completamente incapsulati in acciaio, con doppia o singola laminatura di alluminio e - solo in solfato - con sistema tongue&groove. Consentono di accedere al plenum direttamente o tramite botola, e sono la soluzione ideale per gli edifici da consegnare omologati alla committenza prima che ne venga definita la destinazione finale: ogni tipologia di pannello può infatti essere **rivestita successivamente alla posa**, scegliendo tra tutte le finiture disponibili sul mercato.

CALCIUM SULPHATE PANELS
panneaux en sulfate de calcium _ pannelli in solfato di calcio

EN CBI Europe's **Semi-encapsulated steel panels**: high density panels made with conglomerated chipboard or calcium, coated all the way up to the upper edge, with 0.5 mm of galvanised steel. They are designed to combine the reduced thickness of 28 mm (therefore optimising transport and handling during construction), with a high load bearing resistance of the floor itself.

100% inspectable, they are assembled exclusively with materials from CBI Europe's sustainable supply chain and LEED points are given in buildings where they are used.

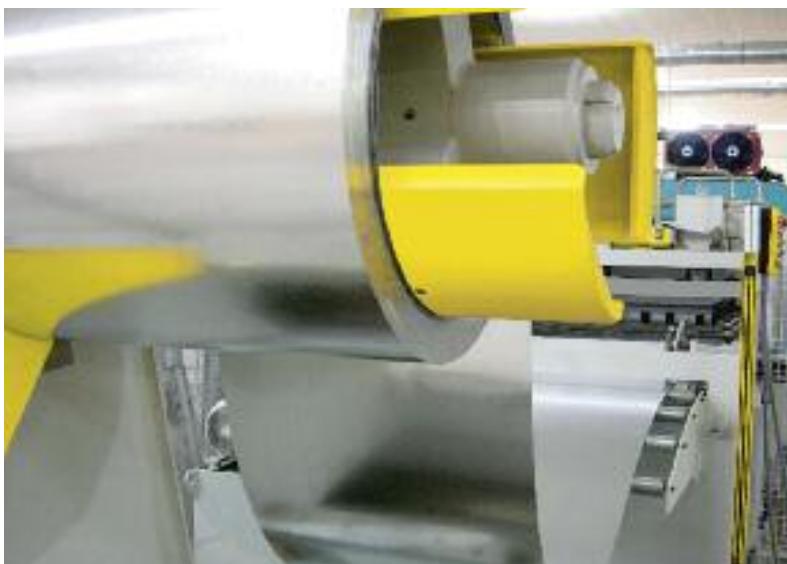

panneaux semi-encapsulées en acier.

FR **Semi-encapsulated steel panels** de CBI Europe: ce sont des panneaux de haute densité conglomérat en bois ou de sulfate de calcium, revêtus jusqu'au bord supérieur d'acier galvanisé de 0,5 mm, ils sont conçus pour accompagner l'épaisseur réduite (28 mm) - par conséquent l'optimisation du transport et de la manutention en construction - haute résistance aux contraintes sur les planchers réalisés.

Inspection à 100%, ils sont assemblés exclusivement avec des matériaux de la chaîne d'approvisionnement durable CBI Europe et des points LEED donnés dans les constructions où ils sont utilisés.

pannelli semi-incapsulati in acciaio.

IT **Semi-encapsulated steel panels** di CBI Europe: pannelli ad alta densità in conglomerato ligneo o solfato di calcio, rivestito fino al bordo superiore in acciaio zinato 0.5 mm, sono progettati per combinare lo spessore ridotto (28 mm) - quindi ottimizzazione di trasporti e movimentazioni in cantiere - all'alta resistenza alle sollecitazioni da carico dei pavimenti realizzati. Ispezionabili al 100%, vengono assemblati esclusivamente con materiali provenienti dalla filiera sostenibile CBI Europe, con attribuzione di punti LEED nelle costruzioni dove vengono impiegati.

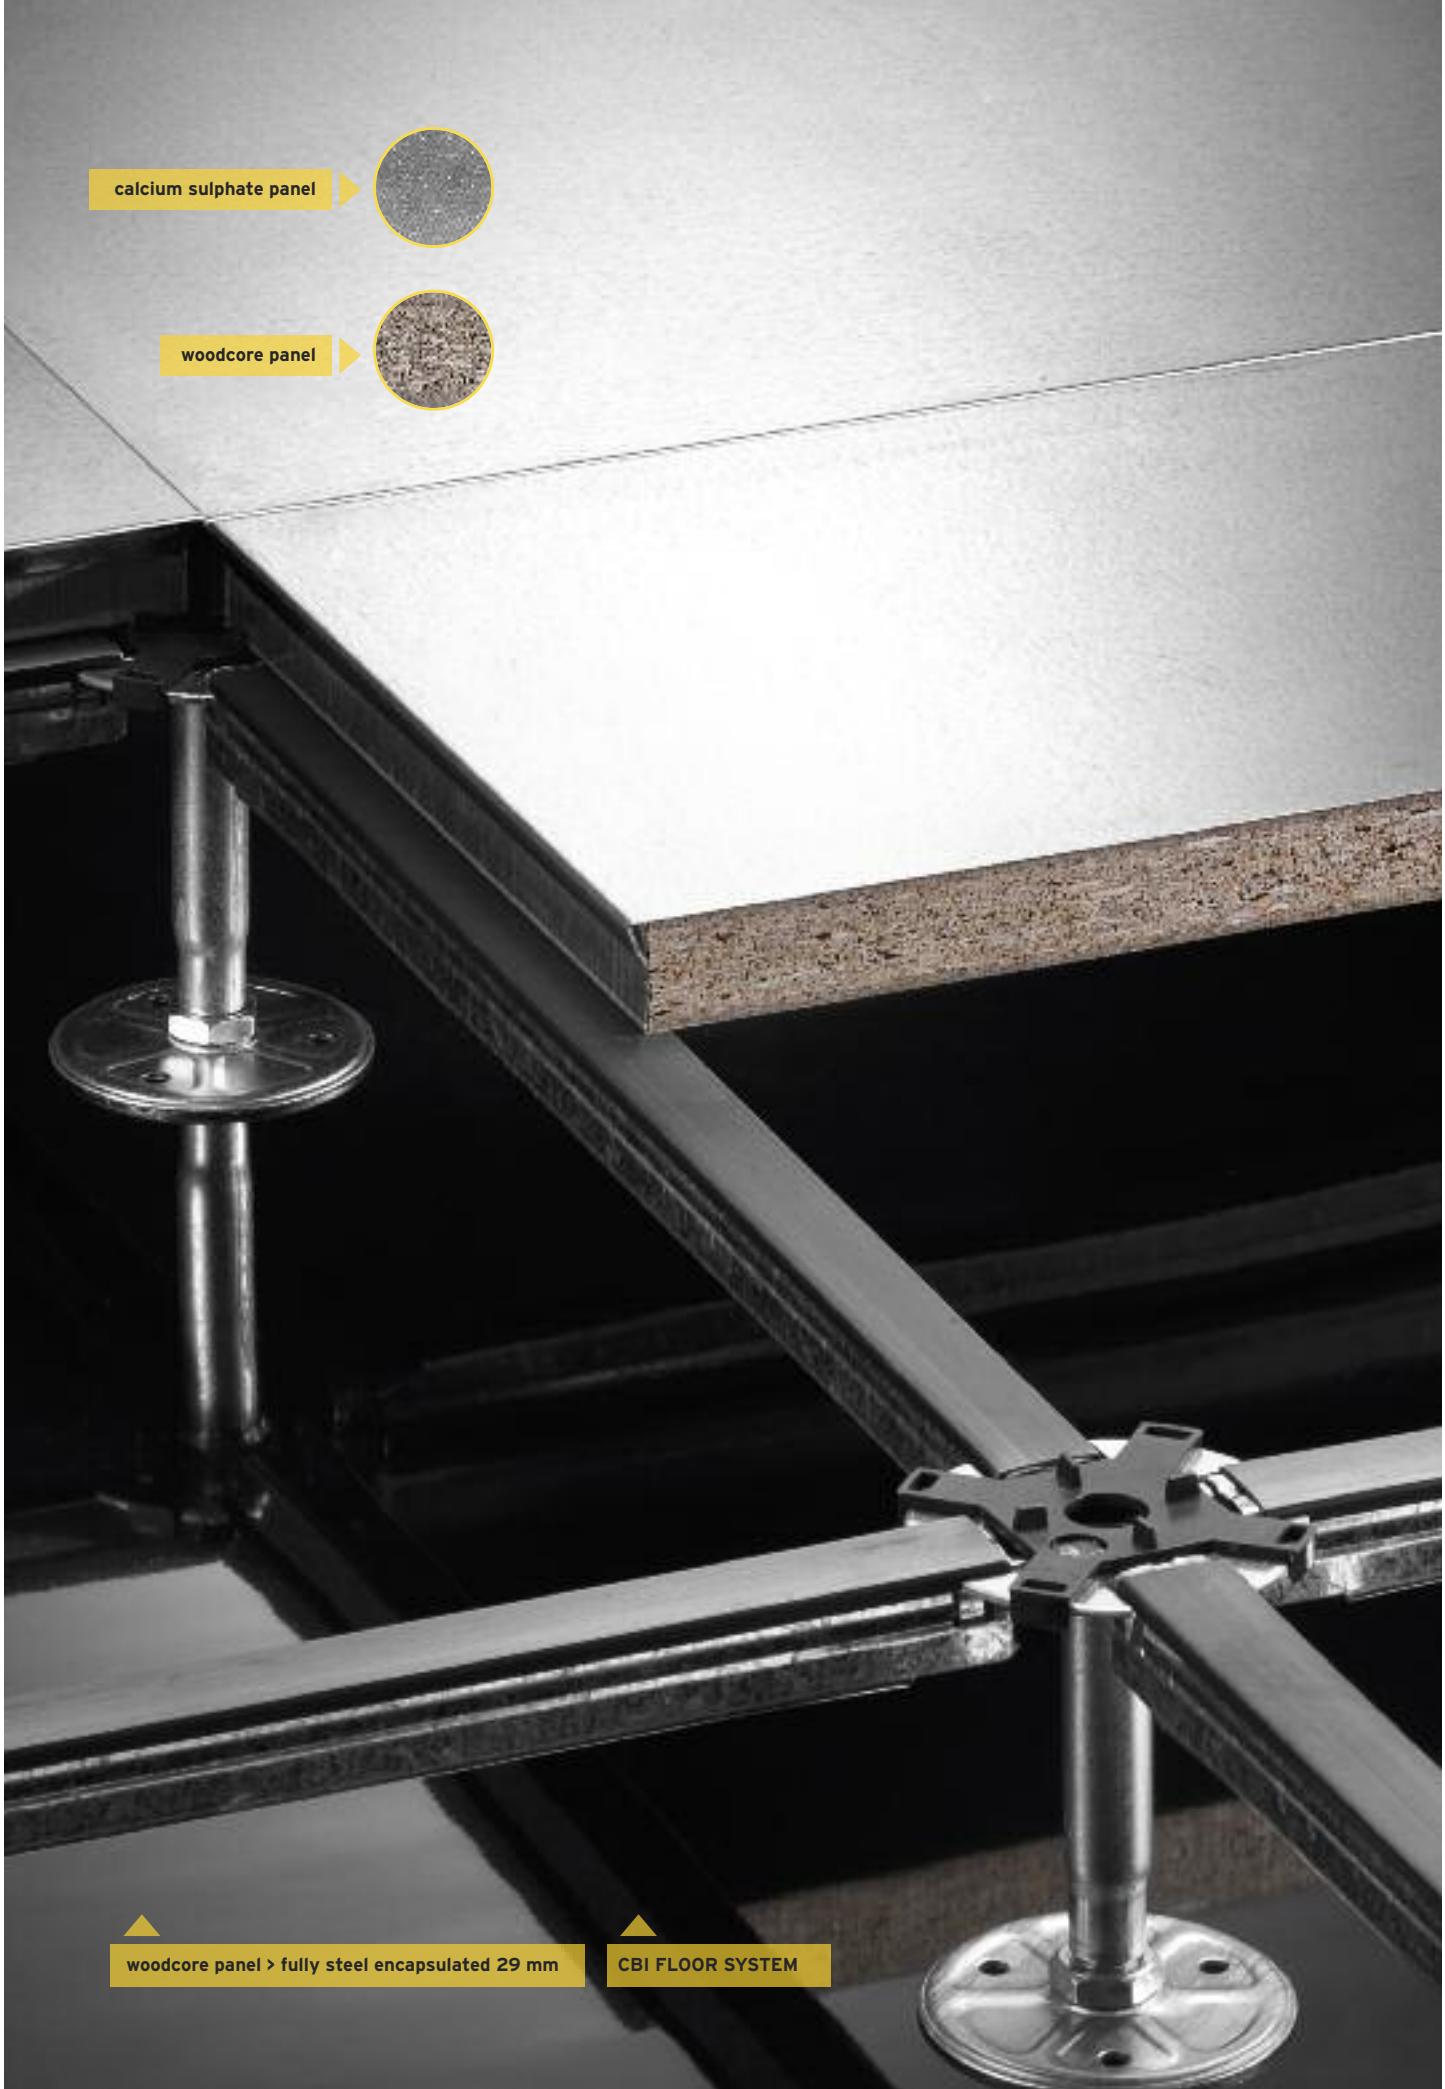

CBI Europe has designed and installed the world's first completely automated production line for fully steel encapsulated panels.

The line has an annual output of 500,000 m².

CBI Europe a conçu et mis en œuvre dans ses établissements, la première ligne au monde totalement automatisée de production de panneaux encapsulés en acier, avec une capacité productive de 500 000 m² annuels.

CBI Europe ha progettato e messo in opera nei propri stabilimenti la prima linea al mondo totalmente automatizzata per la produzione di pannelli encapsulati in acciaio, con una capacità produttiva di 500.000 m² annui.

panneaux en sulfate de calcium
pannelli in solfato di calcio

TONGUE&GROOVE PANELS

EN CBI Europe's high density calcium sulphate or woodcore **tongue&groove panels** are the perfect choice for refurbished and new-build glue-free floors. Used instead of conventional floor slabs, they offer various benefits, **including inspectability of the underfloor plenum**, and quick and easy installation thanks to tongue and groove joints. On average 50% lighter than concrete floor coverings, these panels reduce total load on the building structure and facilitate transport and workability on site. They are extremely resistant to fire and humidity and can be used with any type of finish.

panneaux tongue&groove.

FR Les panneaux en sulfate de calcium ou aggloméré de bois haute densité **tongue&groove by CBI Europe** se prêtent parfaitement aux ouvrages de rénovation ou aux nouvelles constructions avec des systèmes à sec. **Ils remplacent la chape traditionnelle et allient l'avantage de l'inspectabilité** du compartiment technique par le biais de trappes de visite et la vitesse d'installation, grâce à l'accrochage mâle/femelle. En moyenne de 50% plus légers que les chapes en béton, ils comportent une plus faible charge globale sur les structures du bâtiment, en facilitant aussi bien le transport que leur maniabilité sur le chantier. Extrêmement résistants à l'humidité et au feu, on peut leur appliquer tous les types de finitions existantes.

pannelli tongue&groove.

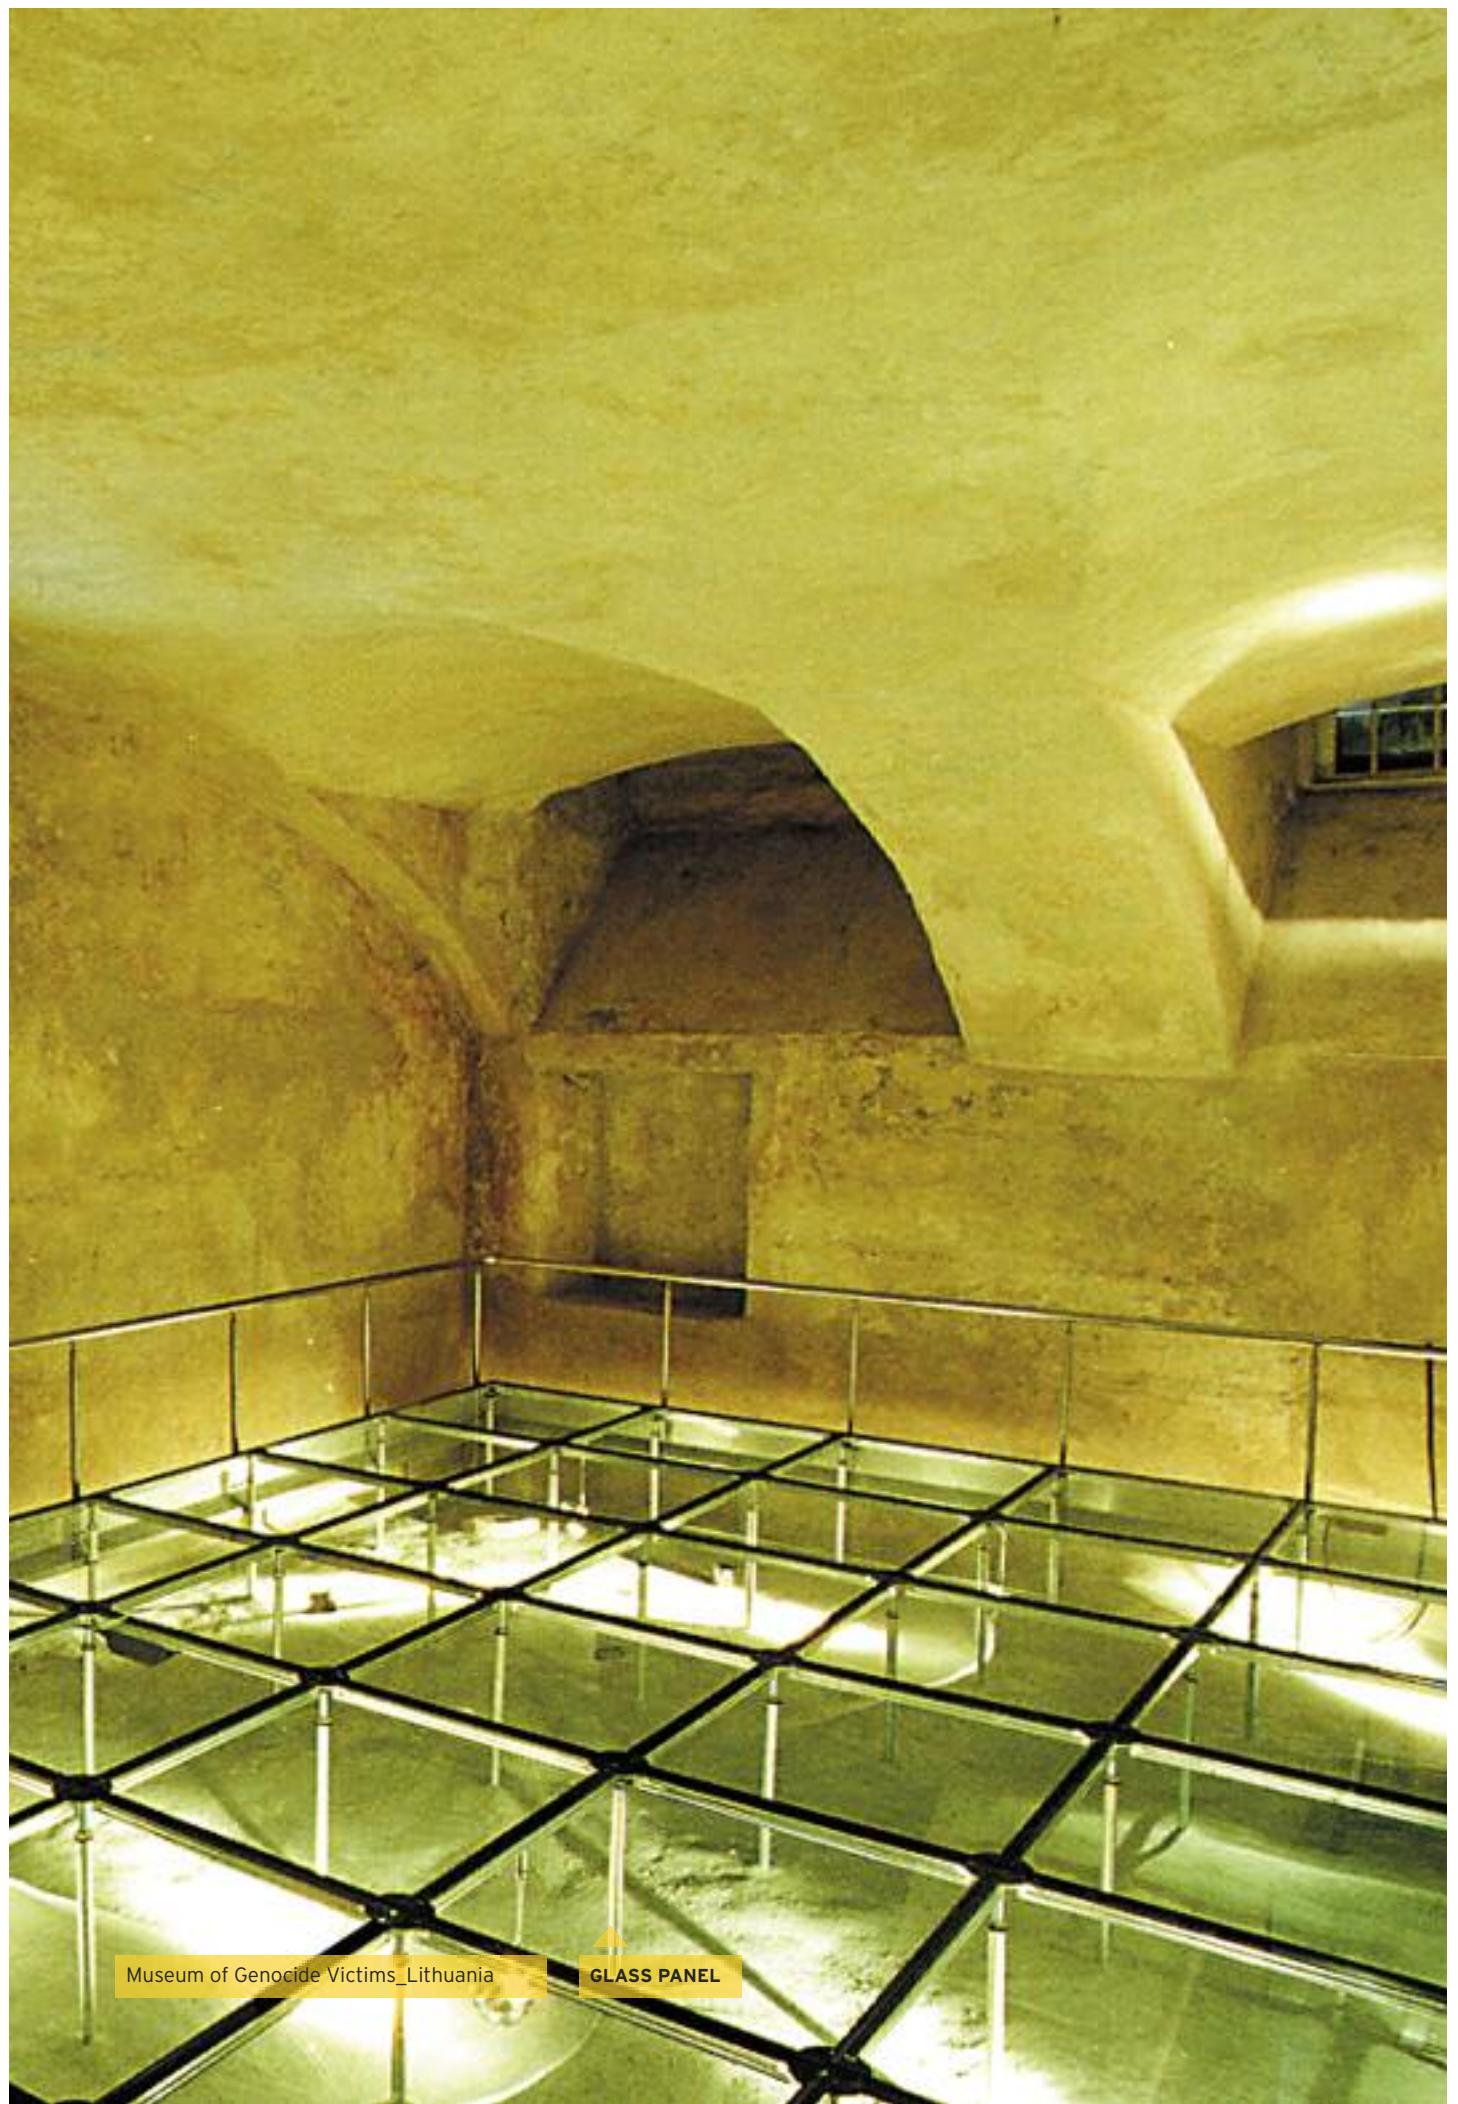

IT I pannelli in solfato di calcio o conglomerato ligneo ad alta densità **tongue&groove by CBI Europe** si prestano perfettamente per opere di ristrutturazione o per nuove costruzioni con sistemi a secco. **Sostituiscono il massetto tradizionale**, unendo il vantaggio dell'ispezionabilità del vano tecnico tramite botole alla velocità di installazione, grazie all'aggancio maschio/femmina. Mediamente più leggeri del 50% rispetto alle coperture in calcestruzzo, comportano un **minor carico complessivo sulle strutture del fabbricato**, agevolando sia il trasporto che la lavorabilità in cantiere. Estremamente resistenti all'umidità e al fuoco, vi si possono applicare tutti i tipi di finiture esistenti.

RADIANT FLOORS

CLIMA SYSTEM

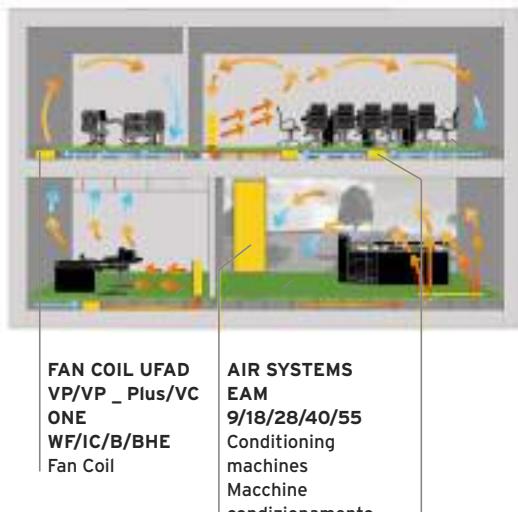

RADIANT FLOORS • UFAD SYSTEMS

Flexibility, comfort and energy saving

EN CBI Europe's radiant floors are designed on the principle of low thermal inertia, and combine energy saving with excellent comfort in both heating and cooling applications. Flexible and versatile, **they integrate perfectly with raised floors, panelled walls and false ceilings**, and work perfectly with all CBI Europe air conditioning products.

Radiant panel and UFAD systems can be combined to maximise integration between primary air treatment and dehumidification systems and summertime cooling systems. Superb comfort is ensured by a combination of technical and aesthetic elements that blend together so well that it is almost impossible to tell the difference between them.

UFAD SYSTEMS

confort invisible
à haut contenu technologique.

FR Les planchers radiants Floors by CBI Europe sont conçus selon un principe de basse inertie thermique, qui associe l'économie d'énergie et un confort de haut niveau, aussi bien pour le chauffage que pour le rafraîchissement. Flexibles et polyvalents, **ils s'intègrent parfaitement avec les planchers surélevés, les revêtements de parois et les faux plafonds**, ainsi qu'avec tous les autres produits d'Air Conditioning.

L'association du système radiant et des systèmes UFAD permet une intégration ultérieure de l'installation par le traitement de l'air primaire, la déshumidification et une partie de la charge thermique d'été.

Les éléments technologiques et esthétiques s'harmonisent entre eux au grand avantage du confort, au point de rendre pratiquement impossible la distinction entre la valeur thermique et la valeur architecturale.

comfort invisible
ad alto contenuto tecnologico.

IT I pavimenti radianti Floors by CBI Europe sono progettati secondo un principio di bassa inerzia termica, che unisce risparmio energetico ad un elevato livello di confort, sia per il riscaldamento che per il raffrescamento. Flessibili e versatili, **si integrano perfettamente con pavimenti sopraelevati, rivestimenti a parete e controsoffitti**, oltre che con tutti gli altri prodotti Air Conditioning.

L'associazione dei radianti con i sistemi UFAD consente un'ulteriore integrazione impiantistica con il trattamento dell'aria primaria, la deumidificazione e parte del carico termico estivo.

Gli elementi tecnologici ed estetici si armonizzano tra loro a tutto vantaggio del comfort, al punto da rendere impercettibile la distinzione tra valenza termica ed architettonica.

RADIANT FLOORS

EN CBI Europe's radiant floors offer all the benefits of raised flooring combined with a superbly comfortable microclimate, energy saving, and reduced environmental impact.

The heat transfer fluid that flows through the panels provides draught-free radiant heating or cooling and ensures far more uniform temperature and humidity and therefore a far higher level of wellbeing than can be achieved by conventional systems.

plancher radiant.

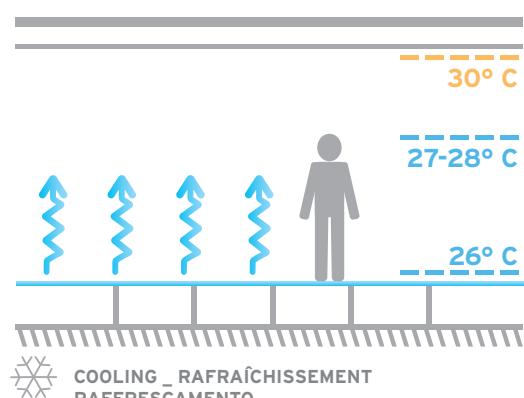

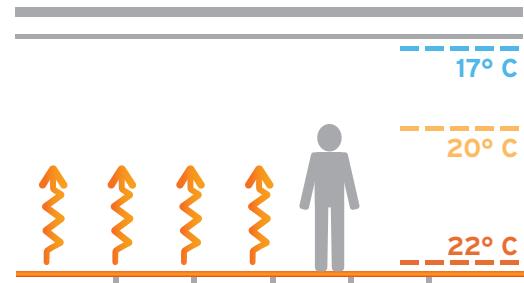

FR Les avantages d'un plancher surélevé alliés au confort d'un microclimat haut de gamme, à faible impact énergétique et environnemental.

À travers le fluide vecteur intégré dans chaque brique, le chauffage et le refroidissement ont lieu par rayonnement, sans mouvement d'air, avec des résultats de température et d'humidité plus uniformes par rapport aux systèmes traditionnels, et un plus grand bien-être pour l'utilisateur.

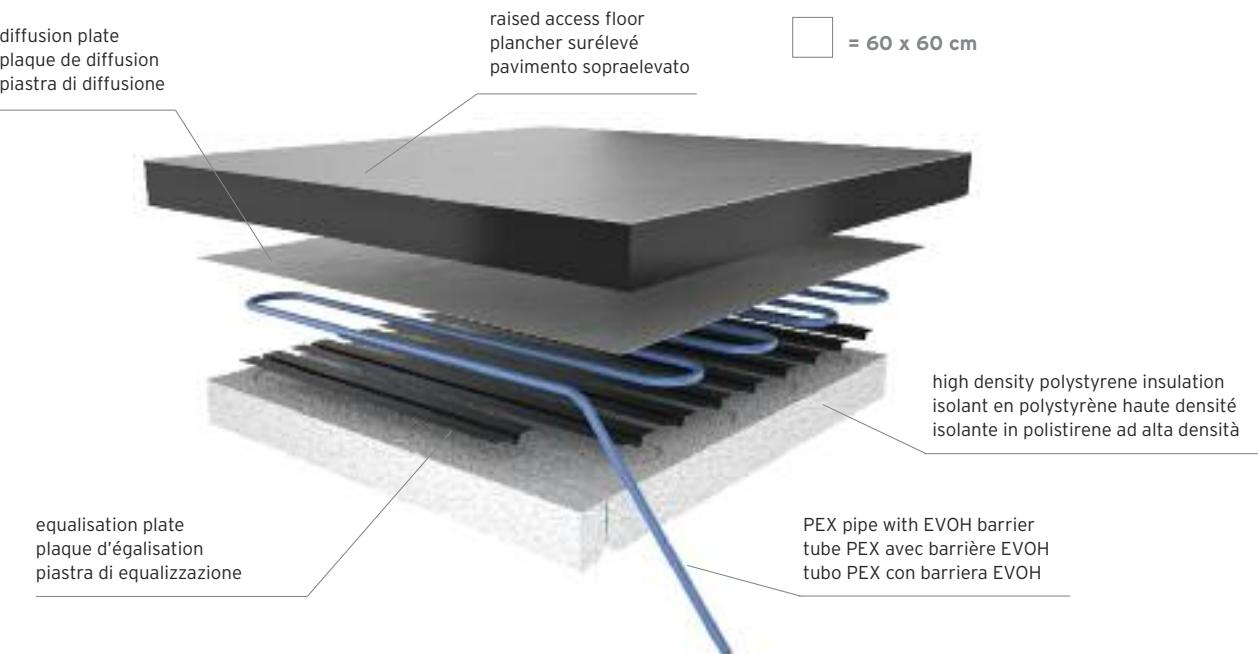

pavimento radiante.

IT Molti i vantaggi di un pavimento sopraelevato uniti al comfort di microclima di fascia alta, a ridotto impatto energetico-ambientale.

Attraverso il fluido vettore integrato all'interno di ogni singola mattonella, riscaldamento e raffreddamento avvengono per irraggiamento, senza movimento d'aria, con risultati di temperatura ed umidità più uniformi rispetto ai sistemi tradizionali, ed un maggior benessere per l'utente.

description_descrizione			
AIRRAD001 Radiant floor kit _ Kit radiante pavimento	kW/m ² 75	45	

TONGUE&GROOVE RADIANT

EN Each **tongue&groove Radiant** panel has its own independent radiating element. A high level of performance is guaranteed by perfect contact between the panel and the radiating element. The heat transfer fluid that flows through the panels provides draught-free radiant heating or cooling and ensures far more uniform temperature and humidity and therefore a **far higher level of wellbeing than can be achieved by conventional systems**.

Extremely low heat stratification and low thermal inertia also contribute to cutting system running costs.

tongue&groove radiant.

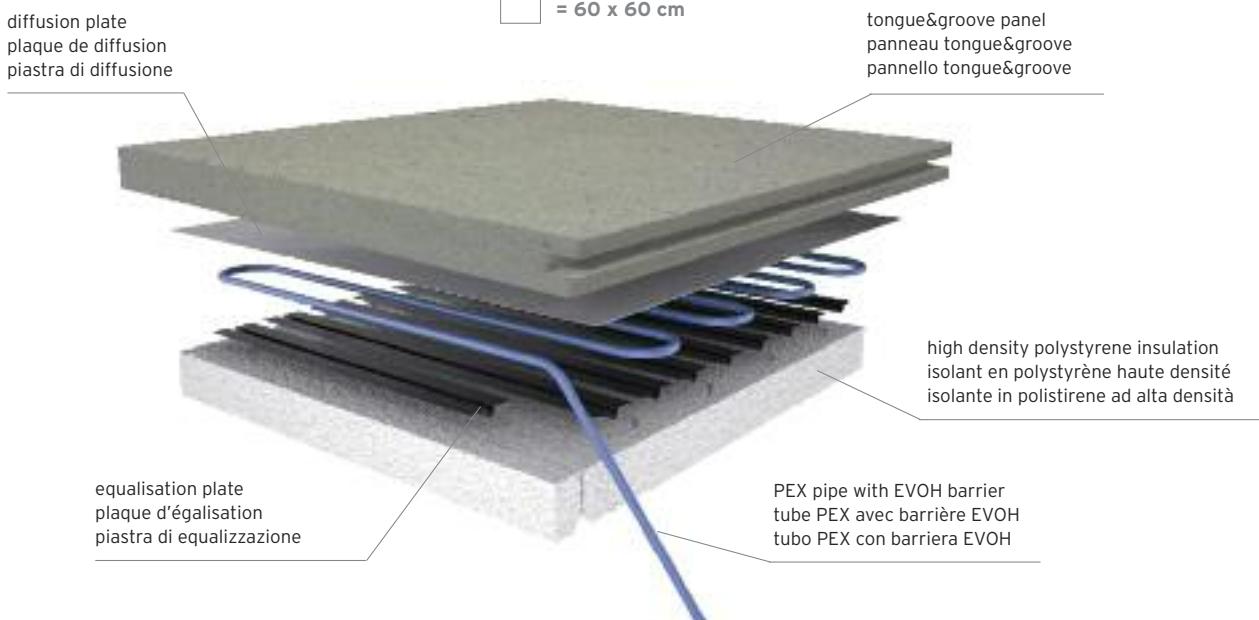

FR La section radiante, indépendante pour chaque panneau **tongue&groove Radiant**, assure un contact parfait entre la brique et le radiant, avec de hauts niveaux de performance. Le fluide vecteur est intégré dans le panneau. Le chauffage et le refroidissement ont lieu par rayonnement, sans mouvement d'air, avec des **résultats plus uniformes par rapport aux systèmes traditionnels, mais aussi avec un meilleur bien-être pour l'utilisateur**.

La stratification très réduite de la chaleur et la basse inertie thermique abattent considérablement les coûts d'exercice.

tongue&groove radiante.

IT La sezione radiante è indipendente per ogni pannello **tongue&groove Radiant** ed assicura un contatto perfetto tra mattonella e radiante, con alti livelli di performance. Il fluido vettore è integrato all'interno del pannello, e riscaldamento e raffreddamento avvengono per irraggiamento, senza movimento d'aria, con **risultati più uniformi rispetto ai sistemi tradizionali ed un maggior benessere per l'utente**.

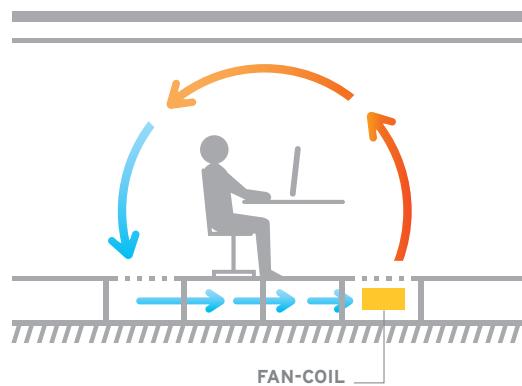

La ridottissima stratificazione del calore e la bassa inertie termica abbattono considerevolmente i costi d'esercizio.

VP/VP_PLUS/VC UNDERFLOOR FAN-COIL

EN CBI Europe's V Series fan-coils can be fully integrated in raised floors, and are specially designed for installation in underfloor plenums. These powerful units can be customised to operate at different fan speeds. Standard versions can be fitted with air return grilles for use as active elements in temperature controlled comfort islands. Ducted versions can be used as active elements in underfloor air treatment systems. Thanks to a 3-row finned heat exchanger with high dehumidification power, V Series fan-coils perform particularly well in heating applications, but offer high performance in cooling mode too. V Series fan-coils are housed under 60x60 floor panels with robust aluminium grilles, and can be repositioned easily and without any masonry work. Office spaces can therefore be reorganised and rearranged flexibly and easily at any time. Apart from the grilles, the units are completely invisible and are suitable for use with all kinds of interior design. Thermostatic control and remote control systems are available. V Series fan-coils are available in standard versions (VP), with remote controller (VP_Plus) and ductable versions (VC).

Fan coil sottopavimento.

IT Completamente integrabile con un pavimento sopraelevato, il Fan-Coil serie V viene inserito nel plenum sotto-pavimento. Di notevole potenza, è personalizzabile in base alla velocità del ventilatore. Corredato con un'ulteriore griglia di ripresa può essere impiegato come elemento attivo di un'isola di comfort termico oppure, nella versione canalizzata, può essere elemento attivo di un sistema di trattamento dell'aria sempre sotto-pavimento. Particolarmente performante nel riscaldamento, grazie alla batteria alettata a 3 ranghi ad alto potere deumidificante, consente alte prestazioni anche in condizionamento. Completamente invisibile grazie ad una robusta griglia in alluminio, è alloggiato sotto una mattonella 60x60 ed è facilmente riposizionabile senza opere murarie, permettendo così di organizzare lo spazio ufficio in modo flessibile e rimodellabile in qualsiasi momento. Si adatta all'estetica di ogni ambiente, ed è gestibile tramite termostato o telecomando. È prodotto nelle versioni VP standard, VP_Plus con telecomando e VC canalizzabile.

The robust, treadable, aluminium grille is adjustable in height to ensure a perfectly flush fit with the floor, and is available in two versions: standard deflection and 15° deflection.

La robusta griglia calpestabile in alluminio filo pavimento è regolabile in altezza, ed è disponibile sia nella versione lancio standard che con lancio a 15°.

Installed in under-floor plenums, fan-coils offer a combination of high performance and low noise that makes them ideal for use in all working environments.

Alloggiato nel plenum sottopavimento, il Fan-Coil ha una performance di rumorosità bassa che ne consente il posizionamento in ogni situazione di ambiente di lavoro.

VP/VP _ PLUS FAN-COIL

Functional layout: air aspirated from the underfloor plenum is ducted towards the delivery grille.

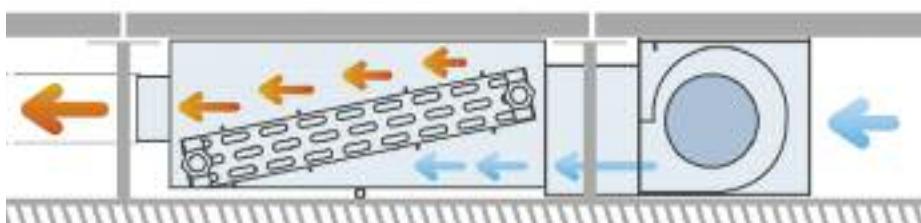

Schema funzionale di base: l'aspirazione dell'aria avviene nel plenum sottopavimento e canalizzata verso la griglia di uscita.

VC FAN-COIL

Functional layout: air aspirated from the underfloor plenum is pushed through the ducts towards the output grilles.

Schema funzionale di base: l'aria aspirata nel plenum sottopavimento viene spinta attraverso i condotti verso le griglie di uscita.

ONE-WF/-IC/-B/-BHE AIR HANDLING TERMINAL UNITS FOR RAISED FLOORS

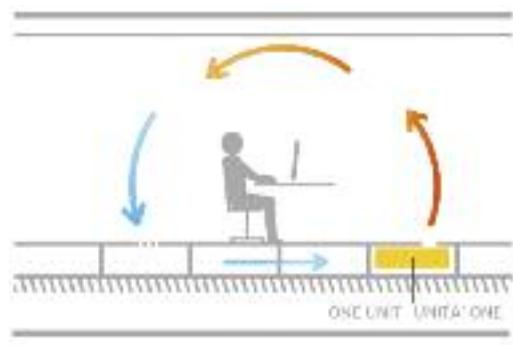

EN ONE is an air treatment unit integrated with a raised floor, completely positioned under the floor is inserted in place of a 60x60 tile. Of considerable power can be personalized according to the 7 speed of the fan. It is arranged for operation in heating or in cooling. It allows you to get a great comfort in air dehumidification thanks to the heat exchange coils to 3 ranks. ONE is easy to install, is easily removable or repositionable without any construction, so it creates the real fully flexible space, reshaped at any time.

It adapts to the needs of growth and change of the spaces. Positioned above it, the robust walkable grilles can be made in various sizes. The angle of the fins, straight or 15 ° optional, allows a customizable and optimized distribution of air flows for each environment. ONE can be used as a booster to improve air distribution in environments where the treatment air is already entered in the underfloor plenum (UFAD systems).

Unità terminali per il trattamento aria in pavimenti sopraelevati.

IT ONE è un'unità di trattamento aria integrato nel pavimento sopraelevato, viene posizionato sotto al pavimento nello spazio di una mattonella 60x60. Di potenza considerevole, può essere personalizzato grazie alle 7 velocità del ventilatore. È predisposto per operare in riscaldamento e raffreddamento. Permette di ottenere un elevato comfort in deumidificazione dell'aria grazie alla batteria di scambio termico a 3 ranghi. ONE è semplice da installare, è facilmente smontabile e riposizionabile senza alcuna costruzione, così da creare uno spazio completamente flessibile e ri-configurabile in ogni momento.

Si adatta alle esigenze di crescita e cambiamento dello spazio. Posizionabili sopra di esso, le robuste griglie calpestabili possono essere realizzate in varie misure. L'angolo delle alette, dritto o 15° opzionale, permette una distribuzione del flusso d'aria personalizzato ed ottimizzato per ogni ambiente. ONE può essere usato come booster per migliorare la distribuzione dell'aria negli ambienti in cui l'aria trattata è già proveniente dal plenum sottopavimento (UFAD systems).

EAM 9/18/28/40/55 CONDITIONING MACHINES

EN The series of air conditioning units developed by CBI Climate is particularly suitable for heating and conditioning of office space, of small and large sizes. With nominal power from 9 kW to 55 kW, these units are able to cover a wide range of applications with air flow until 10.000 m³/h. Extremely high performance both for heating and conditioning allow to obtain the best thermo-hygrometric conditions in the environments in which they are used. The machines are equipped with 3 raw batteries and humidifier (optional). The G4 filters ensure correct air filtration in any setup configuration. Parameters such as temperature, humidity and machine output air speed can be easily adjusted to the values most appreciated by users, which can thus have high sense of well-being within the environment. Pre-painted galvanized steel plate thickness 25 mm guarantees thermal and acoustic insulation. Complete control of the thermo-hygrometric parameters of the environment:
- Temperature - Relative humidity - Output air speed

Macchine per il condizionamento.

IT La serie di macchine per il condizionamento sviluppata da CBI Climate è particolarmente adatta al riscaldamento e alla climatizzazione degli spazi adibiti ad uffici, di piccole e grandi dimensioni. Con potenze nominali che vanno dai 9 kW ai 55 kW, queste macchine sono in grado di coprire una vasta gamma di applicazioni con portate di aria fino a 10.000 m³/h. Estremamente performanti sia per il riscaldamento che per il condizionamento permettono di ottenere le migliori condizioni termoigrometriche negli ambienti nei quali sono impiegati. Le macchine sono dotate di batterie a 3 ranghi e di umidificatore (optional). I filtri G4 di serie assicurano una corretta filtrazione dell'aria in qualsiasi configurazione d'installazione.

Parametri come la temperatura, l'umidità e la velocità dell'aria in uscita dalla macchina possono essere facilmente regolati sui valori più graditi agli utenti, i quali possono così avere una elevata sensazione di benessere all'interno dell'ambiente. La pannellatura in acciaio zincato preverniciato di spessore 25 mm garantisce isolamento termico e acustico.

Controllo completo dei parametri termo igrometrici dell'ambiente:
- Temperatura - Umidità relativa - Velocità aria in uscita

strong, environment-friendly, and extremely stable

Strong, environment-friendly, and extremely stable.
The addition of a bamboo finish to CBI Europe's raised access floor range offers a greener, alternative floor surface. The introduction of bamboo is tangible proof of CBI Europe's commitment to protecting the environment. Bamboo is not only extremely strong but is the world's fastest growing plant (it can grow up to a metre a day in tropical regions). Use of bamboo therefore makes a major contribution to reducing the problem of deforestation. Often referred to as "natural steel", bamboo is cool to the touch in the summer and warm in the winter.

résistant, éologiquement compatible, hautement stable

Résistant, écologiquement compatible et hautement stable.
L'introduction de la finition en bambou dans la gamme Raised Access Floors représente le choix écologique et alternatif de CBI, fruit d'un engagement concret à l'avantage de l'environnement: le bambou est une plante très résistante et avec la croissance la plus rapide au monde - 1 mètre par jour dans les régions tropicales; un facteur qui, en fait, réduit le problème de la déforestation. Également appelé «acier naturel», il est frais en été et chaud en hiver.

resistente ecocompatibile altamente stabile

Resistente, ecocompatibile ed altamente stabile.
L'inserimento della finitura in bambu all'interno della gamma Raised Access Floors rappresenta la scelta verde ed alternativa di CBI, frutto di un concreto impegno a vantaggio dell'ambiente: il bambu è una pianta molto resistente e con la crescita più rapida al mondo - 1 metro al giorno nelle regioni tropicali, fattore che riduce di fatto il problema delle deforestazioni.
Denominato anche "acciaio naturale", risulta fresco d'estate e caldo d'inverno.

The load resistance tests have been performed in CBI Europe's internal laboratory and simulate the test method indicated by UNI EN 12825: 2001. The results obtained at a height of 20 cm may vary depending on the installation and the general conditions of the site. If the project requires a certification from a third party this must be explicitly requested.
Le prove di resistenza al carico sono state eseguite nel laboratorio interno CBI Europe e simulano il metodo di prova indicato dalla normativa UNI EN 12825:2001. I risultati ottenuti ad un'altezza di 20 cm possono variare in funzione dell'installazione e delle condizioni generali del cantiere. Qualora il progetto richieda una certificazione da un ente terzo questa dovrà essere esplicitamente richiesta.

The average incidence is theoretic. It changes according to the dimension and shape of the space.

The incidences specified are purely theoretical and vary according to floor dimensions and layout.

Le Incidenze riportate sono teoriche in quanto variano in relazione alle dimensioni ed alla conformazione dei locali.

RAISED ACCESS FLOORS

INSTALLATION AND MAINTENANCE _ POSE ET ENTRETIEN INSTALLAZIONE E MANUTENZIONE

CARE AND INSTALLATION

Premises where the floor is stored or installed must have a dry climate and completed window and floor frames; the temperature must be maintained between 5 and 35 °C and the humidity between 40% and 75%. The floor should be installed 60 days after the concrete casting and 30 days from completion of internal finishings. The foundation must be dry, smooth and clean; if a slab is used it is advisable to adopt a selflevelling floor foundation. It is advisable to treat the floor foundation with an anti-dust paint. The distribution of the equipment must observe the technical requirements of the floor. The floor has to be installed only after completion of internal equipment and finishing. Only the installer can walk on the floor during installation. As soon as installation is completed and before any other application is made, the floor has to be tested.

USE AND MAINTENANCE

When moving considerable loads over the floor, use trolleys and non-flexible panels between the floor and the wheels. When laying or removing the panels, use suitable tools. Do not damage or move the gasket of the pedestals and of the stringers. Removed panels must be mounted again in the original position. For any intervention remove the fewer panels than possible. Floor can be cleaned with a damp cloth; do not use water or cleaning agents directly and be careful when near an electric cable system. Do not wash plenum with water. Do not use alkaline detergents, soda, soaps, solvents, pumice, sandpaper, and any kind of abrasive. Before waxing the floor, make preliminary test on a limited floor surface. If the floor has particular electrical characteristics, use an electrical compatible wax.

STOCKAGE ET INSTALLATION

Les locaux dans lesquels devra être stocké ou installé le plancher surélevé doivent être secs et les huisseries devront être complétées; leur température devra être comprise entre 5 et 35 °C et l'humidité relative entre 40 et 75%. Avant d'installer le plancher, les ouvrages de maçonnerie devront être terminés depuis au moins 60 jours et les travaux de finition humide depuis au moins 30 jours. La sous-couche devra être sèche, lisse et propre; en présence d'une dalle coulée, il est conseillé de prévoir l'adoption d'une sous-couche autonivelante. Nous conseillons un traitement de vernissage anti-poussière de la sous-couche. La distribution des installations doit respecter la modularité du plancher surélevé et tenir compte de ses encombrements. Le montage du plancher surélevé devra être effectué seulement lorsque toutes les installations et les finitions internes auront été complétées.

Personne, à l'exception des installateurs, ne devra marcher sur le plancher durant le montage. Le plancher surélevé devra être essayé et livré dès que l'installation aura été complétée et avant l'application d'éventuelles cires de protection et l'intervention des installateurs.

USAGE ET ENTRETIEN

Toujours utiliser des chariots pour déplacer des charges importantes sur le plancher, en intercalant des panneaux rigides entre les roues et le plan de piétement, afin de répartir les charges. Pour le retrait et la pose des panneaux, utiliser impérativement les outils de levage prévus à cet effet. Veiller de ne pas endommager ou déplacer les joints d'étanchéité des pieds et des traverses. S'ils sont endommagés, les remplacer. Les panneaux déposés doivent être remontés dans leur position d'origine. Si vous devez démonter plusieurs panneaux, évitez de former des « îles » ou des « canaux » en retirant seulement la quantité minimum nécessaire à l'intervention.

Pour le nettoyage, ne pas utiliser d'eau ou de détergents liquides directement sur le plancher surélevé; utiliser des chiffons humidifiés et bien essorés et prêter une grande attention à proximité des systèmes de distribution électrique. Ne pas utiliser d'eau pour nettoyer le plenum. Ne pas utiliser de détergents alcalins, de la soude, des savons, des solvants, de la pierre ponce, du papier de verre ou des abrasifs divers. Si vous devez cirer le plancher, il est conseillé de faire d'abord un essai sur une portion limitée de celui-ci. Si vous devez cirer un plancher avec des caractéristiques électriques particulières, utiliser des cires électriquement compatibles.

CUSTODIA E INSTALLAZIONE

I locali in cui dovrà essere immagazzinato o installato il pavimento sopraelevato, dovranno essere asciutti e con serramenti completati; la temperatura dovrà essere compresa tra i 5 e i 35 °C e l'umidità relativa tra il 40 ed il 75%. Prima di installare il pavimento le opere murarie dovranno essere terminate da almeno 60 giorni e le opere di finitura a umido da almeno 30 giorni. Il sottofondo dovrà es-

sere asciutto, liscio e pulito; in caso di soletta a getto è consigliabile prevedere l'adozione di un sottofondo autolivellante. È consigliabile un trattamento di verniciatura antipolvere del sottofondo. La distribuzione degli impianti dovrà rispettare la modularità del pavimento sopraelevato e dovrà tenere conto degli ingombri dello stesso. Il montaggio del pavimento sopraelevato dovrà essere effettuato solo quando saranno completati tutti gli impianti e le finiture interne. Nessuno, a eccezione degli installatori, dovrà camminare sopra il pavimento durante il montaggio. Il pavimento sopraelevato dovrà essere collaudato e consegnato non appena ultimata l'installazione, prima dell'applicazione di eventuali cere protettive e dell'intervento degli impiantisti

USO E MANUTENZIONE

Utilizzare sempre carrelli per spostare carichi notevoli al di sopra del pavimento, interponendo tra le ruote ed il piano di calpestio dei pannelli rigidi al fine di ripartirne i carichi. La rimozione e la posa dei pannelli deve essere eseguita utilizzando tassativamente gli appropriati attrezzi di sollevamento. Fare attenzione a non danneggiare o spostare le garniture di tenuta dei piedini e delle traverse; in caso di danneggiamento provvedere alla sostituzione. I pannelli rimossi dovranno essere ricollocati nella posizione originaria. Dovendo smontare diversi pannelli, evitare la formazione di "isole" o "canali" togliendo solo la minima quantità necessaria all'intervento. Per la pulizia non usare acqua o detergenti liquidi direttamente sul pavimento sopraelevato; utilizzare panni inumiditi e ben strizzati e porre molta attenzione nelle vicinanze dei sistemi di distribuzione elettrica; non usare acqua per la pulizia del plenum. Non usare detergents alcalini, soda, saponi, solventi, pomice, carta vetrata ed abrasivi vari. Dovendo cercare il pavimento, è consigliabile eseguire una prova preliminare su una porzione limitata dello stesso. Nel caso debba essere cerato un pavimento con particolari caratteristiche elettriche, utilizzare cere elettricamente compatibili.
